

# Spirent **GSS6300M**

## Multi-Channel GNSS Simulator

### Key Features

- Multi-channel GPS/SBAS L1 C/A and/or QZSS and/or GLONASS L1 C/A and/or BeiDou-2 and/or Galileo E1 signals
- Simulate 3D position from GPS/SBAS, QZSS, GLONASS, BeiDou or Galileo constellations
- IEEE-488, USB, Ethernet or RS-232 control interfaces
- Supplied with Spirent SimCHAN™ software
- Comprehensive remote command set for easy ATE integration
- Rack mount 2U chassis
- Interactive run time control over power level, user position, date, time, atmospheric condition, Doppler, PRN and data message
- May be synchronized to external systems via 1PPS/Trigger, reference frequency input/output and 1PPS output
- Fully supports GSS6300 single channel operation

The GSS6300M is the ideal entry-level multi channel GNSS simulator for busy production testing environments and receiver integrators. Its 36 channels of operation can simulate L1/E1 signals from GPS/SBAS, QZSS, GLONASS, BeiDou and Galileo to test the fundamental positioning capabilities of any GNSS device.

More features with software enhancement pack (optional)

- Select from range of trajectories including 3GPP TS 25.171 defined
- Generate route-matched trajectory data from Google Maps®
- Add realistic receiver antenna pattern and multipath effects
- Real-time visualisation of calculated position of device under test data with truth (simulation) data
- Add environmental effects including tropospheric (wet or dry) and ionospheric correction

The GSS6300M GNSS Signal Generator can be configured with 4 or 8 channels per constellation. It is easily upgradable in the field to add any constellation to an existing GSS6300M. Typical configurations include:

- GPS only
- GPS\SBAS, GLONASS
- GPS\SBAS, QZSS, GLONASS, BeiDou and Galileo

The GSS6300M is a “one-box” solution with everything required to start testing immediately and can be easily controlled from a tablet or smartphone, or via remote commands across multiple interfaces including USB, IEEE-488 or Ethernet.

The GSS6300M offers all of the flexibility, ease-of-use and reliability you expect from Spirent. Also, including continuous run mode for efficient high-volume production testing and real-time user control, allowing you to create your own scenarios and modify parameters such as user position, date and time.

## Specification

### Output Frequency

- GPS/SBAS/QZSS 1575.42MHz
- GLONASS L1 (Ch0) 1602MHz
- BeiDou-2 B1 1561.098MHz
- Galileo E1 1575.42MHz

### Signal Codes

- GPS L1 C/A PRN 1 - 63
- SBAS L1 C/A PRN 120 - 138
- GLONASS L1 C/A Channels -7 to +6
- BeiDou-2 B1 PRN 1 - 37
- Galileo E1 CBOC PRN 1 - 50
- QZSS PRN 182 - 202

### Signal Dynamics

- Relative Velocity (Max)  $\pm 15,000\text{m/s}$
- Velocity Resolution 0.01m/s

### Signal Level

- GPS/SBAS/QZSS L1 C/A -130dBm nominal
- GLONASS L1 C/A -131dBm nominal
- BeiDou-2 B1 -133dBm
- Galileo E1 -127dBm nominal

### Signal Level Control

- Range +15/-20dB
- Resolution 0.1dB
- Linearity  $\pm 0.5\text{dB}$
- Accuracy  $\pm 1.0\text{dB RSS}$

### Signal Quality

- Spurious  $< -30\text{dBc}$
- Harmonics  $< -40\text{dBc}$
- Phase Noise  $< 0.1 \text{ Rad RMS}$
- Master Clock Stability  $< \pm 1 \times 10^{-9}$  over one day

### Signal Generator Unit

- 4 or 8 Channels per constellation GPS/SBAS L1 C/A  
GLONASS L1 C/A  
Galileo E1-B/C CBOC  
BeiDou BD2 B1I  
QZSS L1 C/A
- Size 449 x 386 x 89mm  
(17.75 x 15.25 x 3.5in)
- Weight 7.0kg(15.5lbs)
- Power 100 - 240 V AC  
50 - 60 Hz

Product Specification (MS3085) is available on request.
